Wojciech Makrocki

AI builder & automation scripter · I ship working software through AI coding agents

Łódź, Poland · open to UK relocation · r3flexmlg@gmail.com · wojtekmr3.github.io · github.com/WojtekMR3

20+ scripts, bots and jobs I automated | 23,509 P2P orders run on my own tooling | Merged PR · NousResearch/hermes-agent | 2 Chrome extensions

SUMMARY

Self-taught builder who turns manual work into tools that run on their own. Everything I ship is built through AI coding agents (Claude Code, OpenAI Codex, Grok), and only that: I write the spec, review every change and test the result in the real browser, app or server. From 2024 to 2026 I ran a licensed Polish crypto P2P exchange as its sole builder and operator and automated almost all of it. That business is closed and I am fully available.

SELECTED PROJECTS

SunsetMonitor · *C#, Windows · public, v2.9.7*
Tray app that keeps external monitors in step with the sun: Day/Night profiles for brightness, contrast and saturation over DDC/CI, smooth sunrise and sunset transitions.

Volume Pro · *Chrome extension · on the Chrome Web Store*
Per-tab volume slider (0.1% steps, up to 1000% boost) for YouTube, Twitch, Kick, Instagram and TikTok, kept working through site redesigns with an end-to-end test harness.

AgentDeck · *Electron, React, TypeScript*
Desktop app running several Claude Code, Codex and Grok terminals side by side, with per-tab model pickers, in-tab agent switching and session restore.

pdf-insight · *React, TypeScript, Cloudflare · live demo*
PDF to summary with source quotes and Zod-validated JSON; OCR for scanned pages, chunking for long files; Gemini in the cloud or fully local with Ollama.

Media Downloader · *Chrome extension · in store review*
Saves the video a page is playing on any site: follows HLS playlists or captures the MediaSource stream and rebuilds a clean MP4 locally, no server.

Open source · NousResearch/hermes-agent
PR #67642: reset-aware fallback for subscription rate limits (~400 lines, 15 tests), merged via #77631 in Aug 2026 with authorship retained.

EXPERIENCE

Founder, sole builder and operator — licensed crypto P2P exchange

Poland · 2024 – 2026 · licensed VASP · now closed

- Ran 23,509 P2P orders for 11,329 clients across four exchanges (Binance, Bitget, MEXC, WEEX) on tools I built with AI agents.
- Automation: Playwright bot matching bank transfers to orders with a needs-human review queue; floating price engine; order-history scrapers with CSV/XLSX export; monthly report generators; Telegram alerts; systemd and scheduled jobs on Linux VPSes.
- KYC site with document OCR and selfie liveness check; AML/CFT certified (2025); suspicious-transaction reporting and replies to bank and police inquiries.

SKILLS

AI agent tooling	Claude Code, Codex, Grok daily; MCP servers (Playwright, Context7); project rules, specs and review loops; local models with Ollama
Web & extensions	Chrome extensions (MV3), React, TypeScript, Node/Express, Flask, Tampermonkey userscripts
Automation	Python, Playwright browser automation, REST/WebSocket APIs, Telegram bots, CSV/XLSX reporting
Linux & hardware	Production Linux VPS admin (systemd, Caddy/Nginx, databases, scheduled exports); PC builds; Windows and OS-level troubleshooting; VirtualBox labs with custom networking
Languages	Polish (native) · English (advanced working level)
Education	Self-taught, no degree · AML/CFT certificate (2025)
